

Royale Black – PP1201

Product profile

PP1201 is a cost-efficient black for colouration and covering power in a variety of mature applications, such as thinner multilayer films, engineering plastics, pipes & drip laterals where particle size of <25 nm is mandatory. It has got very low filterability index (Delta P) which is required for fibre applications.

PP1201 is a pelleted black and filled masterbatch that has good absorption, good colour, strength and good covering power.

This product is commonly used where good weathering resistance and opacity is required. The dispersibility of PP1201 depends on the equipment used and the formulation.

Typical Value

NSA m ² /g	STSA m ² /g	OAN CC/100g	Tint Strength % ITRB	Sieve Residue 325M, PPM	Heat Loss (as shipped) %
118	109	112	112	20	0.6

Recommended dosage can vary depending upon end use & modification of other ingredients.
Packaging - 25 kg paper bag or 500/1000 kg bulk bag.

Application Field

Typical Application	Recommended Dosage
Plastic Masterbatches	Upto 40%
Coarse Staple Fibre	30-35%
